

IST Concept Form

Instructions: This form is intended to collect high-level information for an investigator’s initial concept for a potential investigator sponsored trial (IST) proposal submission to Arcus Biosciences. This form is optional and is not a requirement prior to submission of a full IST proposal.

Arcus will review the concept to confirm if it is of strategic interest to consider for our IST program. If the concept is of interest to Arcus, the investigator may submit a full study proposal to the [Arcus IST Portal](#) for review by the Arcus review committee.

Arcus support of a concept does not guarantee acceptance of a full study proposal.

Please complete this form, provide to your Arcus Medical Science Liaison contact with a cc to ISTprogram@arcusbio.com.
